
GHISHAN (GS) – Litepaper v1.1

1. Introduction

GHISHAN (GS) is a trade-focused crypto asset built on the **Polygon (MATIC)** network. With no governance or utility promises, GHISHAN is intentionally designed to appeal to **active traders, memecoin communities, and market momentum enthusiasts**. It is simple, scalable, and built around a powerful combination of **mass distribution and deflationary scarcity**.

2. Token Overview

- **Token Name:** GHISHAN
 - **Symbol:** GS
 - **Network:** Polygon (MATIC)
 - **Total Supply:** 120,000,000 GS
 - **Decimals:** 18
 - **Type:** Trade-Only Token (No utility, no governance)
-

3. Purpose

GHISHAN is created purely for trading. It aims to be **fast-moving, psychologically attractive, and community-driven** — without the burdens of utility, staking complexity, or DAO governance. Its goal is to **reward early traders** and **build price momentum** through limited supply and smart token distribution.

4. Token Distribution

Category	Allocation
Presale	60,000,000 GS
DEX Liquidity Pool	30,000,000 GS

CEX Liquidity Pool

30,000,000 GS

🧠 *Note: No tokens are allocated for team, airdrops, or development. This ensures maximum decentralization and fair distribution.*
